

# Early Successional Habitat: The Overlooked and Underappreciated Landscape Feature

# Early Successional Habitat:

- Grasslands ~ Meadows
- Shrub-scrub ~ Old Field Habitat

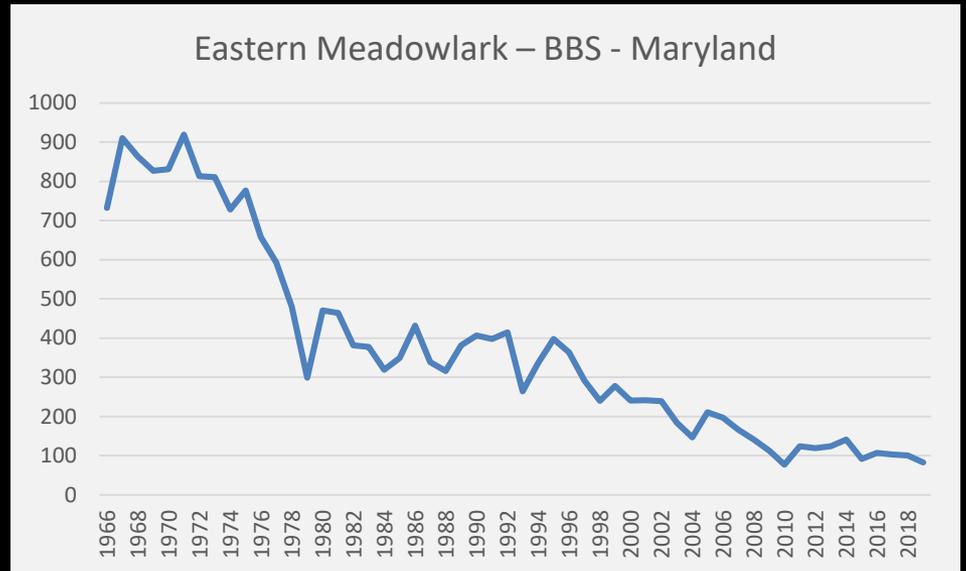

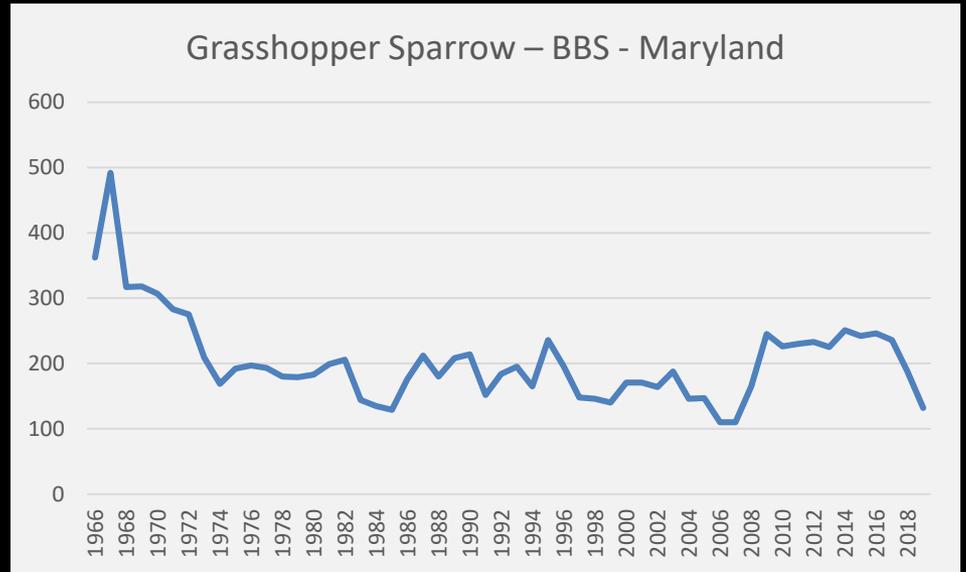

# Ecosystem Benefits and Services:

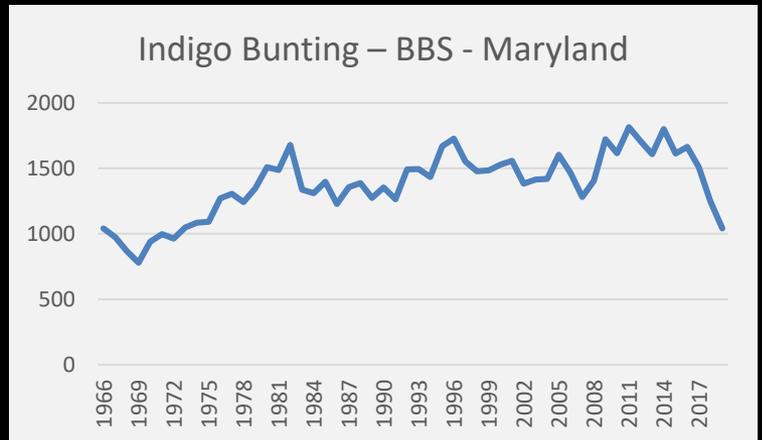

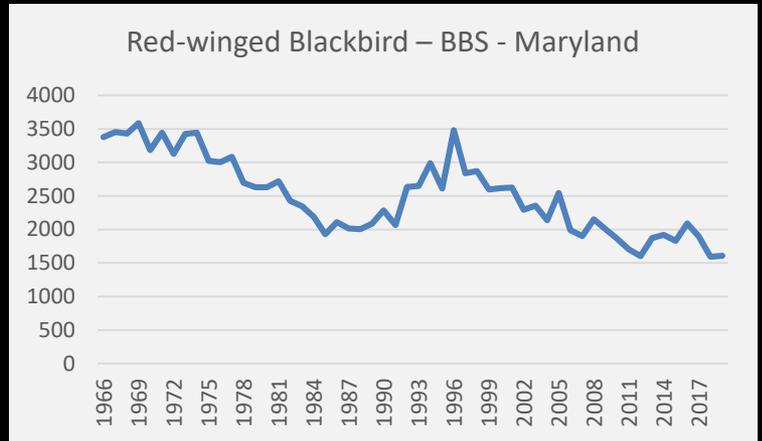

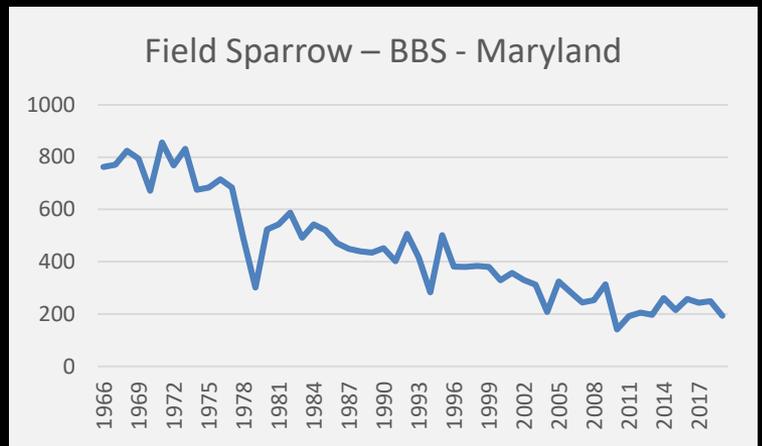

- Mitigate drought and floods
- Cycle and move nutrients
- Detoxify and decompose waste
- Control agricultural pests
- Maintain biodiversity
- Generate and preserve soils and renew their fertility
- Contribute to climate stability
- Regulate disease-carrying organisms
- Protect soil from erosion
- Protect watersheds, and stream and river channels
- Pollinate crops and natural vegetation
- Provide aesthetic beauty
- Provide wildlife habitat
- Provide recreation
- Provide research opportunities

# Natural Lands Project: Wildlife for Water Quality

2015 - 2023

## Private Lands

- Meadows – 872 acres
- Wetlands – 63 acres

## Public Lands

- Conquest Preserve - 230 acres
- North County Park - 45 acres
- Sassafras NRMA - 130 acres
- Tuckahoe SP - 47 acres

83 ac meadow planted in spring 2018 at Sassafras NRMA. 47 acre forest planting in 2020.

# What can be done in Calvert County?

- Convert cropland – create new habitat
- Convert non-native csg to wsg
- Promote management of open spaces and prevent maturation
- ROWs
- Pollinator plantings
