

Critical Area Reforestation Application Package Checklist

- ❑ The applicant (property owner or authorized agent) must complete the *Critical Area Reforestation Application* with signature and date. Former hard copy applications will not be accepted.
- ❑ Enter the property information into the *CA Reforestation Property Information and Plant List* Excel file. Property information can be found through [SDAT](#).
- ❑ Within the same Excel file, use the *Critical Area Native Plants* tab and enter the quantity of each plant species requested. [Click here](#) for more information on native plant species.
- ❑ Create a planting plan showing the planting location for each tree and shrub requested. Each planting location must be clearly labeled with the plant name. A property map can be downloaded from [Critical Area Map](#) and printed to use for a planting plan. When the planting plan has been finished, scan the plan and email with the above items.

The submittal period is from January through April each year.

Electronically submit completed application package to:

Robin Munnikhuysen
